India's Trade and Exchange Rate Regimes Dr. Debesh Bhowmik

India's Trade and Exchange Rate Regimes

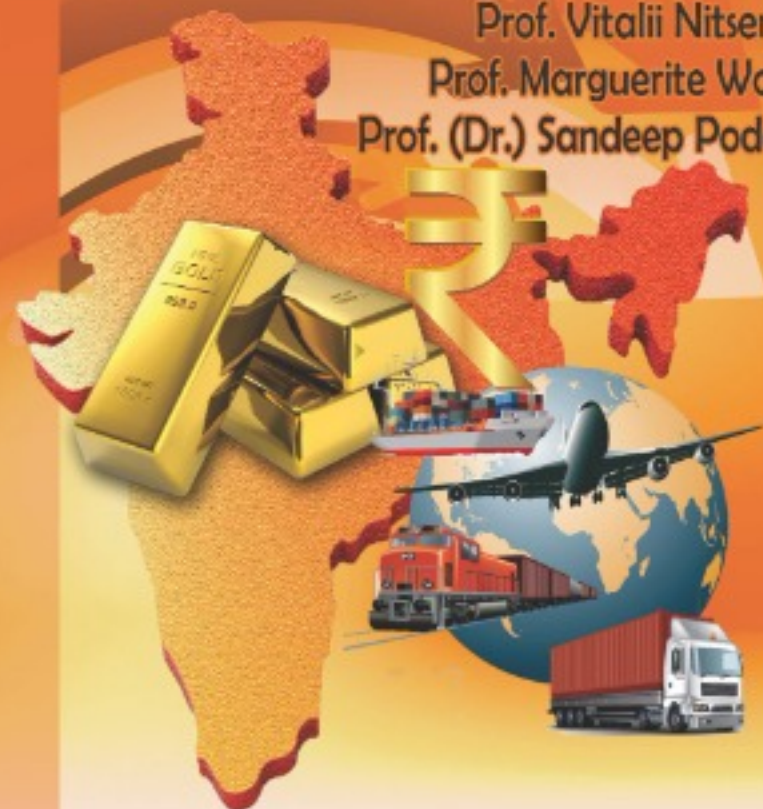

Dr. Debesh Bhowmik

Foreword by :

Prof. Vitalii Nitsenko

Prof. Marguerite Wotto

Prof. (Dr.) Sandeep Poddar

The book titled "India's Trade and Exchange Rate Regimes" covers the long period study on India's Exchange Rate Regimes and their impact on India's trade especially from 1835 to 2020 which was broken into various sub-divisions such as the silver standard period (1835-1892), the gold standard period (1870-1913), the inter-war period (1914-1947) and post-independence or Bretton Woods and post Bretton Woods Periods (1948-2020) respectively. In all the periods, the long-run trends, cycles, seasonal variations of exchange rates, exports and imports were studied through econometric models and their relationships were exemplified by using cointegration and vector error correction models including short run and long run causalities and critically suggested some policy considerations which were interconnected with the theories of exchange rates that were included in the introduction in details. Also, the chapter on the determinants of India's nominal exchange during 1960-2020 deserves good policy implications. The book has added some pictures of coins and data in each regime and has compiled a bibliography as well. The book will help the students, researchers and teachers of Economics and the Econometricians.

Contents include : Impact of Exchange Rate on Export and Import in Silver Standard Regime in India ; Important Research on Silver Standard in India, Observations from the Econometric Models, Trends of the Exchange Rate of Pence Per Rupee, Trends of Export, Trends of Import, Cointegration and Vector Error Correction. **India's Trade and the International Gold Standard in India during 1870-1913 :** Patterns of Nominal Effective Exchange Rate of Rupee, Patterns of India's REER, Patterns of Indian Exports, Patterns of Imports of India, Comparative Study, Cointegration and Vector Error Correction Model of NEER, Cointegration between REER, Exports and Imports. **India's Trade and Exchange Rate Regimes during Inter War Period (1914-1947) :** Trends of the Exchange Rate of a Rupee Per Sterling, Trends of Indian Exports 1914-1947, Trends of Indian Imports 1914-1947, Cointegration and Vector Error Correction Model. **India's Trade and Exchange Rate Regimes Since Independence (1948-2020) :** Results and Observations of the Econometric Models, Patterns of Export, Patterns of Import, Patterns and Trends of Exchange Rate, Cointegration and Vector Error Correction among Exchange Rate, Export and Import, **Determinants of Exchange Rate in India :** Cointegration and Vector Error Correction of Determinants of Exchange Rate, Consideration of Policies; **Appendices.**
